

UI/UX Specification: Aegivex AI

Version: 1.0
Document Type: UI/UX Specification
Project: OKX.AI Genesis Hackathon
Prepared For: Development Team
Prepared By: Aegivex AI Team

1. Overview

This document defines the user interface (UI) and user experience (UX) requirements for Aegivex AI. The goal is to create a clean, modern, responsive, and user-friendly interface that makes blockchain security simple and accessible for everyone.

2. Design Principles

The interface should adhere to the following principles:

- **Clean:** Uncluttered, straightforward visual structure.
- **Minimal:** High signal-to-noise ratio in data presentation.
- **Modern & AI-Inspired:** Sleek dark mode visuals with glowing accents.
- **Responsive & Fast:** Optimized for all screen sizes with minimal latency.
- **Accessible & Beginner-Friendly:** Clear explanations for complex security findings.

3. Design Style

Element	Specification
Theme	Dark Mode (Default)
Primary Color	Electric Blue
Secondary Color	Cyan
Accent Color	Purple

Element	Specification
Background	Dark Gray / Black
Typography	Inter
Icons	Lucide React
Animations	Framer Motion

4. User Experience Goals

- Complete security scans in less than one minute.
- Understand security reports easily without technical background.
- Navigate fluidly across all platform sections without confusion.
- Access key security features with minimal clicks.
- Receive instant visual feedback for all interactive elements.

5. Navigation Structure

Landing Page → Login / Sign Up → Dashboard → AI Chat → Wallet Scanner → Token Analyzer → Smart Contract Analyzer → Website Scanner → Transaction Explainer → Scan History → Settings

6. Screen Specifications

Landing Page

- **Components:** Hero Section, Call-to-Action Button, Features Section, How It Works, Footer.
- **Purpose:** Introduce Aegivex AI and encourage users to start using the platform.

Login Page

- **Components:** Email Input, Password Input, Login Button, Sign Up Link, Forgot Password.
- **Purpose:** Authenticate users securely.

Dashboard

- **Components:** Sidebar Navigation, Top Navigation Bar, AI Security Score, Quick Actions, Recent Scans, Threat Alerts, Statistics Cards.
- **Purpose:** Provide an overview of the user's overall security activity.

AI Chat Page

- **Components:** Chat Window, Prompt Input, Suggested Questions, AI Response Cards.
- **Purpose:** Allow users to interact directly with the AI Security Copilot.

Wallet Scanner

- **Components:** Wallet Address Input, Scan Button, Risk Score Card, Wallet Summary, AI Recommendation.
- **Purpose:** Analyze wallet activity and security status.

Token Analyzer

- **Components:** Token Contract Input, Token Information, Risk Analysis, Liquidity Status, AI Recommendation.
- **Purpose:** Evaluate token safety and contract integrity.

Smart Contract Analyzer

- **Components:** Contract Address Input, Contract Details, Security Analysis, Risk Level, Recommendation.
- **Purpose:** Analyze smart contract security and potential vulnerabilities.

Website Scanner

- **Components:** Website URL Input, Trust Score, SSL Status, Domain Information, AI Recommendation.
- **Purpose:** Detect phishing attempts and unsafe websites.

Transaction Explainer

- **Components:** Transaction Input, Transaction Summary, Permission Analysis, AI Explanation, Risk Score.
- **Purpose:** Explain complex blockchain transactions in plain language.

Scan History

- **Components:** Search Bar, Filter Options, Scan List, Scan Details.
- **Purpose:** Allow users to review previous scans and security audit records.

Settings

- **Components:** Profile Settings, Password Change, Notification Settings, Theme Selection.
- **Purpose:** Manage user account preferences and system parameters.

7. Common UI Components

Sidebar, Top Navbar, Cards, Buttons, Input Fields, Search Bar, Tables, Charts, Badges, Toast Notifications, Modal Dialogs, Loading Spinner, Progress Bar.

8. Responsive Design Guidelines

- **Desktop:** Full dashboard layout with persistent sidebar navigation.
- **Tablet:** Adaptive grid layout; collapsible elements as required.
- **Mobile:** Single column layout with hamburger slide-out navigation menu.

9. Color Usage Guidelines

Color	Meaning / Use Case
Green	Safe / Low Risk
Yellow	Warning / Notice
Orange	Medium Risk
Red	High Risk / Critical Danger
Blue	Information / System Updates
Purple	AI Features & Intelligence Insights

10. UX Guidelines

- Minimize required user clicks across all user flows.
- Provide instant, unambiguous visual feedback for all actions.
- Use plain language instead of dense crypto jargon wherever possible.
- Highlight critical risks prominently on all analysis screens.
- Display interactive loading states during scan processing.
- Show informative success and error messages clearly.

11. Accessibility

- Full support for Keyboard Navigation.
- Compatibility with Screen Readers via semantic HTML structure.
- High Contrast options and strict WCAG color contrast compliance.
- Responsive typography sizing.

12. Error States & Handling

Examples: Invalid Wallet Address, Invalid Contract Address, Network Error, AI Service Unavailable, Scan Failed.

Requirement: Each error state must present a clear explanation and an actionable recovery step.

13. Empty States

Examples: No Scan History, No Notifications, No AI Conversations.

Requirement: Each empty state must include helpful guidance and a call-to-action to begin using the feature.

14. Future UI Enhancements

- AI Voice Assistant integration.
- Real-time push notifications for wallet activity.
- Drag & drop file scan interface.
- Browser extension interface.
- Dedicated mobile app UI layout.
- Multi-language translation support.

15. Expected Outcome

The final UI/UX will deliver a modern, intuitive, and responsive experience that enables users to perform blockchain security analysis quickly while making complex technical information easily

understandable.
